naturally occurring dmt may produce prophecy like states of consciousness and thus represent a bridge between biology and religious experience reveals the striking similarities between the visions of the hebrew prophets and the dmt state described by strassman s research volunteers explains how prophetic and

psychedelic states may share biological mechanisms presents a new top down theoneurological model of spiritual experience after completing his groundbreaking research chronicled in dmt the spirit molecule rick strassman was left with one fundamental question what does it mean that dmt a simple chemical naturally found in all of our bodies instantaneously opens us to an interactive spirit world that feels more real than our own world when his decades of clinical psychiatric research and buddhist practice were unable to provide answers to this question strassman began searching for a more resonant spiritual model he found that the visions of the hebrew prophets such as ezekiel moses adam and daniel were strikingly similar to those of the volunteers in his dmt studies carefully examining the concept of prophecy in the hebrew bible he characterizes a prophetic state of consciousness and explains how it may share biological and metaphysical mechanisms with the dmt effect examining medieval commentaries on the hebrew bible strassman reveals how jewish metaphysics provides a top down model for both the prophetic and dmt states a model he calls theoneurology theoneurology bridges biology and spirituality by proposing that the divine communicates with us using the brain and dmt whether naturally produced or ingested is a critical factor in such visionary experience this model provides a counterpoint to neurotheology which proposes that altered brain function simply generates the impression of a divine human encounter theoneurology addresses issues critical to the full flowering of the psychedelic drug experience perhaps even more important it points the way to a renewal of classical prophetic consciousness the soul of hebrew bible prophecy as well as unexpected directions for the evolution of contemporary spiritual practice

in both clinical and informal settings psychedelics users often report they have undergone something profound and even life altering yet there persists a confounding inability to articulate just what has been imparted informed by multidisciplinary emerging research this book provides an account of the specifically educational aspects of psychedelics and how they can render us ready to learn drawing from indigenous peoples worldwide who typically revere these substances as plant teachers and from canonical thinkers in the western tradition such as plato spinoza kant and heidegger the author proposes an original set of categories through which to understand the educational capabilities of entheogens psychedelics with visionary qualities it emerges that entheogens real power lies not in destabilizing and decentering turning on and dropping out but as powerful aids in restoring and reenchanting our shared worlds

over the past several years the world has faced a series of unprecedented challenges public health crises climate change racial and socioeconomic tensions that have intensified the ongoing epidemic of substance use and overdose the clinical manual of addiction psychopharmacology now in its third edition asserts that substance misuse and addictive disorders although complex in origin are inherently treatable this new edition is rich in information and practical guidance tailored to today s addiction psychiatry and addiction medicine workforce the volume is organized by substance class such as nicotine and tobacco alcohol

cannabis opioids stimulants and hallucinogens offering quick access to essential information expert contributors synthesize the latest scientific advancements in how these substances affect those who misuse them as well as the psychopharmacological and neurobiological bases for available treatments this updated edition also features four new chapters treatment of substance use disorders an examination of the pharmacotherapy of addictive disorders through a broader system based and social lens behavioral addictions an exploration of emerging treatments for non substance related addictive disorders such as gambling disorder integrative approaches to addiction treatment a comprehensive review of treatment literature on nonstandard pharmacotherapies including herbal supplements circuit based interventions for substance use disorders a description of interventional approaches that include transcranial magnetic stimulation and deep brain stimulation other chapters have been updated to reflect the changing social and clinical landscape in which clinicians practice additionally epidemiological review has been intentionally minimized throughout the manual to allow readers to focus on the state of research and clinical treatment recommendations the clinical manual of addiction psychopharmacology third edition is a foundational accessible resource for all those who seek to support the clinical needs of their patients and communities

neuropathology of drug addictions and substance misuse volume 2 stimulants club and dissociative drugs hallucinogens steroids inhalants and international aspects is the second of three volumes in this informative series and offers a comprehensive examination of the adverse consequences of the most common drugs of abuse each volume serves to update the reader s knowledge on the broader field of addiction as well as to deepen understanding of specific addictive substances volume 2 addresses stimulants club and dissociative drugs hallucinogens and inhalants and solvents each section provides data on the general molecular and cellular and structural and functional neurological aspects of a given substance with a focus on the adverse consequences of addictions research shows that the neuropathological features of one addiction are often applicable to those of others and understanding these commonalties provides a platform for studying specific addictions in more depth and may ultimately lead researchers toward new modes of understanding causation prevention and treatment however marshalling data on the complex relationships between addictions is difficult due to the myriad material and substances offers a modern approach to understanding the pathology of substances of abuse offering an evidence based ethos for understanding the neurology of addictions fills an existing gap in the literature by serving as a one stop shopping synopsis of everything to do with the neuropathology of drugs of addiction and substance misuse includes in each chapter list of abbreviations abstract introduction applications to other addictions and substance misuse mini dictionary of terms summary points 6 figures and tables and full references offers coverage of preclinical clinical and population studies from the cell to whole organs and from the genome to whole body

advances in psychology research presents original research results on the leading edge of psychology each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum contents preface cognitive psychology revisiting the efficacy of the glass estimator of effect size for practical significance remembering knowing and schematisation theoretical and practical perspectives emotional sharing and secrecy among indian and english adolescents asymptotic biases of least squares estimators in structural equation modelling behavioural psychology maternal influences on infant behavioural development in western lowland gorillas mother infant skin to skin contact and the development of emotion regulation social and emotional loneliness in childhood measurement characteristics and interviewer effects in assessing empathy measuring the emotion perception component of emotional intelligence a consumer response model for negative word of mouth communication the validity of the defence mechanism test a review of empirical studies evolutionary psychology evolution and the problem of altruism current and historical perspectives index

as featured on the joe rogan experience for fans of the compelling critical and investigative style of best selling authors graham hancock and brian muraresku the first detailed account of the history and science of the world's strangest and most mysterious drug dmt dmt is the world's strangest and most mysterious drug inducing one of the most remarkable and yet least understood of all states of consciousness this common plant molecule has from ancient times to the modern day been used as a tool to gain access to a bizarre alien reality of inordinate complexity and unimaginable strangeness populated by a panoply of highly advanced intelligent and communicative beings entirely not of this world in a story that begins in the amazonian rainforests and ends somewhere beyond the stars andrew gallimore presents the first detailed account of the discovery of dmt and science's continuing struggle to explain how such a simple and common plant molecule can have such astonishing effects on the human mind the history of the drug involves many fascinating characters from the scientific and literary worlds including legendary ethnobotanist dr richard schultes renegade beat writer and drug aficionado william s burroughs philosopher and raconteur terence mckenna and the high priest of the 1960s psychedelic revolution dr timothy leary in the end the story of dmt forces us to reconsider our most basic assumptions about the nature of reality and our place within it

in recent years attention has been drawn on changes in multiple sclerosis ms prevalence according to sex and age we are now aware that ms is not a disease with onset exclusively in the young adult but that pediatric cases are not infrequent as well as onset in older adults the need to assess the role of aging sexual hormones diet and infections has boosted research in many areas from immunology to imaging techniques to psychology an increasing awareness of the impact of ms on personal and sexual relationships with the need to assess patient related outcomes also in clinical trials has driven research not only in psychology but in many other areas the need to integrate information from all these different research

areas is deeply felt

acorns delineates the future of humanity as a reunification of intellect with the deep self having chosen to focus upon ego established securely by the time of christ much more beta brain wave development will destroy our species and others which process has already begun we create our own realities through beliefs intents and desires and we were in and out of probabilities constantly feelings follow beliefs not the other way around
